Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim 9 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim (i.e. claim 6) may not serve as a basis for another multiple dependent claim (i.e. claim 9). See MPEP § 608.01(n). Accordingly, claim 9 has not been further treated on the merits.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7 and 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Capdeville et al (U.S. Patent No. 4,915,884). See col. 4, line 20; col. 5, line 18; col. 6, lines 43-45; and Figs. 1 and 2.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 96/25367 in view of Capdeville et al. The

primary reference discloses the claimed invention with the exception of the presence of inert mineral filler (weighting material) within the granules. Capdeville et al discloses a similar water treatment material, and teaches incorporating a mineral filler within plastic granules. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the water treatment media of the primary reference with mineral filler material within the granules, in order to obtain the advantages disclosed by Capdeville et al for the material of this primary reference.

Bair et al (U.S. Patent No. 5,486,292) discloses a similar water treatment material comprising plastic granules having mineral particulate material dispersed therein.
